

FPI Waste Water Solutions

(Customization Available)

As fluorescent wasted-water is produced while performing part rinsing, PROMAG develops automatic system for FPI wasted-water solutions in order to prevent pollution.

- Active carbon & ozone processing system available
- PLC system control to meet 24 hours auto-processing
- The system made with modular design; able to expand capacity while wasted-water volume increased

Clean System Solutions

(Customization Available)

Ultrasonic Clean Machine

PROMAG Clean Technology Solution is defined as the use of a combination of mechanical motions within a liquid bath or drying chamber to facilitate a specific process objective. The process can be general cleaning for applications like degreasing, precision cleaning, or stripping.

Features

- Available for Multi-stages processes design to achieve high-quality cleaning
- Advanced and friendly PLC touch screen, cabinet design to offer a system automation and saves maintenance and troubleshooting errors
- Interlocks provided to ensure the system runs effectively and safely
- Available to be custom designed and built for cleaning processes of different components, depending on customer's requirement

• Tank unit

• System line

• Clean cabinet

Clean System Solutions

(Customization Available)

Auto Conveyor with Modular Design

The gantry type automatic production line is controlled by computer / PLC, with automated crane, flexible and convenient operation and accurate positioning. It is especially suitable for hardware, circuit boards, plastics and large-scale electroplated workpieces.

Multi-Stations with Gantry

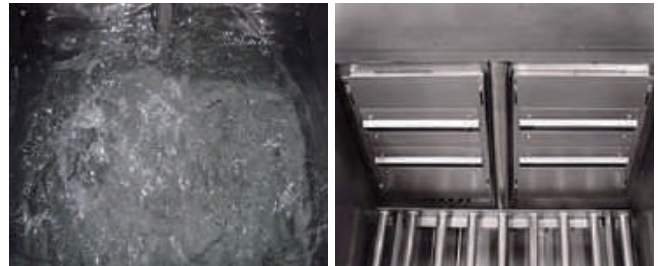

Auto Conveyor with Modular Design

- Special Design for Dual Zone Immersion & Spray
- Ultrasonics, Turbo & Filter Powered Spray

Multi-Stations with Gantry

- Special Design for Dual Zone Immersion & Spray
- Ultrasonics, Turbo & Filter Powered Spray

Auto Conveyor with Modular Design

- Modular Design
- Parameter Controlled by PLC
- Automatic Spray System

Multi-Stations with Gantry

- Power Spray Jet
- Automatic Blowing Refueling
- Automatic Drying Filtration
