

Magnetic Particle Inspection Equipment

2. Power Pack Generators

Portable and mobile MPI Power Packs are ideal for the large, heavy or voluminous components or parts still in-service inspection. Mobile MPI Power Packs are portable electromagnetic current generators which allow encircling and pistol prod techniques to be used - Capable of finding defects in any orientation. Under our manufacturing, our Power Packs with outputs up 10,000A can be manufactured based on customer's demand.

• MPI for sampling / Lab

- Current Amps. : 1,000~10,000A
- Current Type : single phase AC, HWDC, FWDC / 3 phase FWDC

Features

- Portable design allows easy movement of the unit to the part for inspection
- Capable of fully inspecting longer parts without the need for auxiliary coils
- User-friendly operator interface enables quick operational adjustments
